SCENARIO – 06

SE LAB – 02

Alumni Mentorship & Mock Interview Platform

Epic 1: Account Access & Profile Management

Description: Provide secure, role-based login for Student Mentees and Alumni Mentors and let alumni build the profiles that the matching engine depends on.

User Story	As a...	I want to...	So that...
Story 1.1: Secure Login & Role-Based Access	Platform User (Student Mentee / Alumni Mentor)	Log in securely with my institutional account (OAuth 2.0) and be given the correct role	Only verified PES students and alumni can access the platform and see only what their role allows
Story 1.2: Alumni Mentor Profile Setup	Alumni Mentor	Create and update my profile with domain, skills, company, experience, and mentorship areas	The system can match me with students who need guidance in my field

Epic 2: Intelligent Mentor Matching

Description: Recommend relevant alumni mentors to students based on domain, skills, areas of interest, and mentorship requirements (FR-001).

User Story	As a...	I want to...	So that...
Story 2.1: Domain & Preference Entry	Student Mentee	Enter my domain (e.g., Embedded Systems, Cloud Computing), skills, interests, and mentorship / mock-interview requirements	The recommendations I receive are relevant to my goals
Story 2.2: Mentor Recommendation List	Student Mentee	View a ranked list of alumni mentors whose listed domain matches mine and select a suitable mentor	I am connected with alumni who have relevant industry knowledge and experience

Epic 3: Mentor Availability Calendar

Description: Let alumni mentors publish and manage the dates and time slots they are free for sessions (FR-002).

User Story	As a...	I want to...	So that...
Story 3.1: Manage Availability Slots	Alumni Mentor	Create, view, update, and block my available dates and time slots in an availability calendar	I control my schedule, and updated slots become bookable by eligible students without scheduling conflicts

Epic 4: Session Booking & Scheduling

Description: Enable students to view a mentor's open slots and book mentorship / mock-interview sessions without double-booking (FR-003, UC-03).

User Story	As a...	I want to...	So that...
Story 4.1: View Mentor Profile & Open Slots	Student Mentee	Open a recommended mentor's profile and see their expertise and currently available calendar slots	I can choose a session time that suits both of us
Story 4.2: Book Session & Confirmation	Student Mentee	Select an available slot, confirm the booking, and receive a confirmation (mentor, date, time, session type)	The session is scheduled and both the mentor and I are notified
Story 4.3: Double-Booking Prevention	Student Mentee	Be alerted immediately if the slot I chose was booked by another student during checkout and be shown the mentor's remaining slots	No slot is ever double-booked and I can quickly pick another time

Epic 5: Post-Interview Scorecard

Description: Capture structured feedback after every mock interview and keep it private to the people involved (FR-004, NFR-001).

User Story	As a...	I want to...	So that...
Story 5.1: Submit Structured Scorecard	Alumni Mentor	Record a scorecard with ratings (Technical, Communication, Problem-Solving), comments, and feedback after completing a student's mock interview	The student receives structured, actionable feedback on strengths and areas to improve
Story 5.2: Scorecard Privacy & Access Control	Platform System	Allow a scorecard to be viewed only by the associated student and the mentor who submitted it	Sensitive evaluation data stays private as required by the privacy guidelines

Epic 6: Student Mentorship Dashboard

Description: Give students one place to track their sessions and feedback over time (FR-005).

User Story	As a...	I want to...	So that...
Story 6.1: Sessions & Feedback Dashboard	Student Mentee	View my confirmed upcoming sessions, mock interview history, and completed scorecards	I can track my mentorship activity and review feedback for future preparation

Deliverables:

1) EPICS AND STORIES CREATED

i) Epic 1:

Story 1.1 (3 SP)

The screenshot shows a Jira story titled "Story 1.1: Secure Login & Role-Based Access". The breadcrumb trail is "Spaces / SE-LAB-02-PROBLEM-06 / SCRUM-5 / SCRUM-6". The story is in the "Done" state. The description includes the following user story:

- As a: Platform User (Student Mentee / Alumni Mentor)
- I want to: Log in securely with my institutional account (OAuth 2.0) and be given the correct role
- So that: Only verified PES students and alumni can access the platform and see only what their role allows

The right sidebar shows the "Details" section with "Assignee" set to "Unassigned" and a link to "Assign to me".

Story 1.2 (3 SP)

The screenshot shows a Jira story titled "Story 1.2: Alumni Mentor Profile Setup". The breadcrumb trail is "Spaces / SE-LAB-02-PROBLEM-06 / SCRUM-5 / SCRUM-7". The story is in the "Done" state. The description includes the following user story:

- As a: Alumni Mentor
- I want to: Create and update my profile with domain, skills, company, experience, and mentorship areas
- So that: The system can match me with students who need guidance in my field

The right sidebar shows the "Details" section with "Assignee" set to "Unassigned" and a link to "Assign to me".

ii) Epic 2:

Story 2.1 (2 SP)

The screenshot shows a Jira story titled "Story 2.1: Domain & Preference Entry". The breadcrumb trail is "Spaces / SE-LAB-02-PROBLEM-06 / SCRUM-8 / SCRUM-9". The story is in the "Done" state. The description includes the following user story:

- As a: Student Mentee
- I want to: Enter my domain (e.g., Embedded Systems, Cloud Computing), skills, interests, and mentorship / mock-interview requirements
- So that: The recommendations I receive are relevant to my goals

The right sidebar shows the "Details" section with "Assignee" set to "Unassigned" and a link to "Assign to me".

Story 2.2 (8 SP)

The screenshot shows a Jira story titled "Story 2.2: Mentor Recommendation List" with 8 story points. The story is located in the "SE-LAB-02-PROBLEM-06" space, under the "SCRUM-8" scrum. The description includes the following details:

- As a:** Student Mentee
- I want to:** View a ranked list of alumni mentors whose listed domain matches mine and select a suitable mentor
- So that:** I am connected with alumni who have relevant industry knowledge and experience

The right sidebar shows the story is "Done", has 1 viewer, and is unassigned. The parent story is "SCRUM-8 Epic 2: Intelligent Mentoring".

iii) Epic 3:

Story 3.1 (5 SP)

The screenshot shows a Jira story titled "Story 3.1: Manage Availability Slots" with 5 story points. The story is located in the "SE-LAB-02-PROBLEM-06" space, under the "SCRUM-11" scrum. The description includes the following details:

- As a:** Alumni Mentor
- I want to:** Create, view, update, and block my available dates and time slots in an availability calendar
- So that:** I control my schedule, and updated slots become bookable by eligible students without scheduling conflicts

The right sidebar shows the story is "Done", has 1 viewer, and is unassigned. The parent story is "SCRUM-11 Epic 3: Mentor Availability".

iv) Epic 4:

Story 4.1 (3 SP)

The screenshot shows a Jira story titled "Story 4.1: View Mentor Profile & Open Slots" with 3 story points. The story is located in the "SE-LAB-02-PROBLEM-06" space, under the "SCRUM-13" scrum. The description includes the following details:

- As a:** Student Mentee
- I want to:** Open a recommended mentor's profile and see their expertise and currently available calendar slots
- So that:** I can choose a session time that suits both of us

The right sidebar shows the story is "Done", has 1 viewer, and is unassigned. The parent story is "SCRUM-13 Epic 4: Session Booking".

SCRUM-20 Epic 6: Student Mentorship

2) SPRINT, BURNDOWN, AND SUMMARY:

Duration 1 Week — Sprint 1

Sprint Goal: Establish secure login and alumni profiles, enable domain-based mentor recommendations, and let mentors publish their availability calendar.

Story	Title	Story Points
Story 1.1	Secure Login & Role-Based Access	3
Story 1.2	Alumni Mentor Profile Setup	3
Story 2.1	Domain & Preference Entry	2
Story 2.2	Mentor Recommendation List	8
Story 3.1	Manage Availability Slots	5
Total		21

Active sprint board (mid-sprint):

Summary – status overview:

Reports – project and team overview:

Duration 2 Weeks — Sprint 2

Sprint Goal: Deliver conflict-free session booking with confirmations, structured post-interview scorecards with privacy control, and the student mentorship dashboard.

Story	Title	Story Points
Story 4.1	View Mentor Profile & Open Slots	3
Story 4.2	Book Session & Confirmation	5
Story 4.3	Double-Booking Prevention	8
Story 5.1	Submit Structured Scorecard	5
Story 5.2	Scorecard Privacy & Access Control	3
Story 6.1	Sessions & Feedback Dashboard	5
Total		29

3) COMMENTS AFTER SPRINTS FOR EPICS:

Epic 1:

 **Vishnu Patruni**
14 seconds ago

Sprint 1 simulation completed successfully. Both child stories — Story 1.1 (Secure Login & Role-Based Access, 3 SP) and Story 1.2 (Alumni Mentor Profile Setup, 3 SP) — have been moved to Done, burning 6 Story Points. Acceptance criteria verified: only authenticated students and alumni can enter the platform, each user receives the correct role, and mentor profiles now store domain and skill data needed by the matching engine (Epic 2).

  Reply Edit Delete

Epic 2:

 **Vishnu Patruni**
32 seconds ago

All Sprint 1 deliverables for this epic are complete. Story 2.1 (Domain & Preference Entry, 2 SP) and Story 2.2 (Mentor Recommendation List, 8 SP) are marked Done (10 Story Points burned). Acceptance criteria verified: when a student enters valid domain and mentorship preferences, the system lists only mentors whose listed domain matches, and the student can select a mentor — unblocking Epic 4 (Session Booking).

  Reply Edit Delete

Epic 3:

 **Vishnu Patruni**
37 seconds ago

Story 3.1 (Manage Availability Slots, 5 SP) moved to Done in Sprint 1. Acceptance criteria verified: when a mentor adds or changes a slot, the updated date and time appear in the mentor's availability calendar and are immediately visible to eligible students for booking.

  Reply Edit Delete

Epic 4:

 **Vishnu Patruni**
3 minutes ago

Sprint 2 completed for this epic. Story 4.1 (View Mentor Profile & Open Slots, 3 SP), Story 4.2 (Book Session & Confirmation, 5 SP), and Story 4.3 (Double-Booking Prevention, 8 SP) are Done — 16 Story Points burned. Acceptance criteria verified: a booking stores mentor, student, date, and time; the booked slot is no longer available to others; and when two students race for the same slot, the second is alerted and shown the remaining slots (UC-03 alternate flow 6a).

Epic 5:

 **Vishnu Patruni**
3 minutes ago

Story 5.1 (Submit Structured Scorecard, 5 SP) and Story 5.2 (Scorecard Privacy & Access Control, 3 SP) are Done (8 Story Points burned). Acceptance criteria verified: a submitted scorecard is saved against the correct mock interview session and is accessible to the associated student, while any other user is denied access.

Epic 6:

 **Vishnu Patruni**
3 minutes ago

Story 6.1 (Sessions & Feedback Dashboard, 5 SP) moved to Done, completing Sprint 2. Acceptance criteria verified: the student dashboard shows confirmed upcoming sessions and past mock interviews, with the submitted scorecard and feedback displayed for each completed interview.

    

Group Reflection: Agile Workflow & Sprint Simulation

“Translating the Alumni Mentorship & Mock Interview Platform requirements into structured Epics and User Stories drew clear functional boundaries between the Student Mentee and the Alumni Mentor while keeping every acceptance criterion traceable to our Lab 1 requirements (FR-001 to FR-005). Using the Fibonacci sequence during Planning Poker separated low-effort stories such as preference entry (2 SP) from complex, correctness-critical features like mentor recommendation and double-booking prevention (8 SP each). Moving stories across the active Scrum board from To Do to In Progress to Done mirrored the real user journey — from login and profile setup, to matching, booking, and finally the post-interview scorecard — and exposed the key dependency that booking (Epic 4) cannot start until matching (Epic 2) and the availability calendar (Epic 3) are complete. Finally, the burndown charts showed that finishing stories in batches produces steep drops rather than a smooth line, highlighting the need to update task status continuously and to finalise all estimates before starting a sprint to avoid scope-change warnings.”

BURNDOWN CHART
